PROFESSIONAL SUMMARY

Information Technology and Training Professional with over 6 years of experience in full-stack application development, data analysis, and software implementation. Proven expertise in architecting scalable backend systems utilizing Laravel, Filament, and Python. Adept at managing production environments and automated deployment workflows via Vercel and GitHub Actions. Skilled in integrating enterprise payment gateways (DOKU, Midtrans, Jokul Checkout) and designing AI-driven educational solutions. Committed to streamlining organizational workflows and delivering high-impact technological solutions.

WORK EXPERIENCE

Yayasan PINBUK Indonesia, Jakarta

Full-Stack Developer & Technical Lead

Agustus 2019 - Now

- Architected, developed, and deployed 7 integrated web platforms (including yaumiyah.pinbuk.id, kinerja.pinbuk.id, feedback.pinbuk.id, finance.pinbuk.id, tickets.pinbuk.id, institute.pinbuk.id, and sahabat.pinbuk.id) using Laravel and Filament to fully digitize the institution's operational, evaluation, and customer service ecosystems.
- Managed production server environments and system configurations to ensure high availability, security, and optimal performance for the entire PINBUK web ecosystem.
- Integrated enterprise payment processing APIs and webhooks via DOKU, Midtrans, and Jokul Checkout, supporting secure GoPay and Bank Transfer transactions.
- Engineered a proprietary digital organizational architecture utilizing kinerja.pinbuk.id for comprehensive project tracking, integrated with Discord (via MEE6 and Carl-bot) to automate multi-departmental workflows and business certification processes.
- Operated and managed 72 institutional databases for Sharia Microfinance Institutions (LKMS), executing complex SQL commands for data migrations, inputs, and repairs.
- Provided financial application architecture consulting and digital ecosystem implementation for 72 LKMS and BMT institutions across Indonesia.
- Mentored MSMEs in the 2024 Empowerment of the Ummah's Economy program, implementing digital marketing strategies to drive successful sales targets.

LPD Yayasan Pinbuk Indonesia, Jakarta

Artificial Intelligence & Coding Trainer

July 2025 – November 2025

- Delivered intensive Coding and Artificial Intelligence instruction to 30 educators across 6 distinct training locations.
- Evaluated 180 Learning Hours of blended training (In-Service and On-the-Job) to ensure high knowledge retention and practical application.
- Drove a 100% program success rate by providing dedicated mentoring, directly improving instructional quality in 4 Primary Schools and 2 Junior High Schools.

PT USSI Solusi Bisnis Komunitas, Bandung

Database Analyst & IT Support Specialist

May 2018 – July 2019

- Analyzed and managed 27 institutional databases, optimizing SQL commands to ensure data integrity and system performance.
- Engineered and established the School Mini Bank application network infrastructure across 27 partner institutions.

PERSONAL & HIGHLIGHTED PROJECTS

- Teman Pintar (AI Chatbot for Children): Developed an interactive educational AI chatbot. Implemented advanced prompt engineering and script updates to maintain a cheerful and educational instructional persona.
- Telegram Financial Tracker Bot: Designed and deployed an automated Telegram bot to track, categorize, and manage personal financial records through direct messaging interfaces.

EDUCATION

Universitas Indraprasta PGRI, Jakarta

Bachelor of Informatics Engineering (S1) (Graduated 2024) GPA: 3.74 / 4.00

- Thesis: Decision Support System for Determining Best Cake Products using the Weighted Product Method at CV. Antaboga Kharisma (Sistem Pendukung Keputusan Untuk Menentukan Produk Kue Terbaik Menggunakan Metode Weighted Product pada CV. Antaboga Kharisma).
